Arthur David

Food wholesaler serving customers across the south of England, the Midlands and Wales.

CASE STUDY

The need

Arthur David needed resilient leased line connectivity at their three sites in Bristol and Somerset.

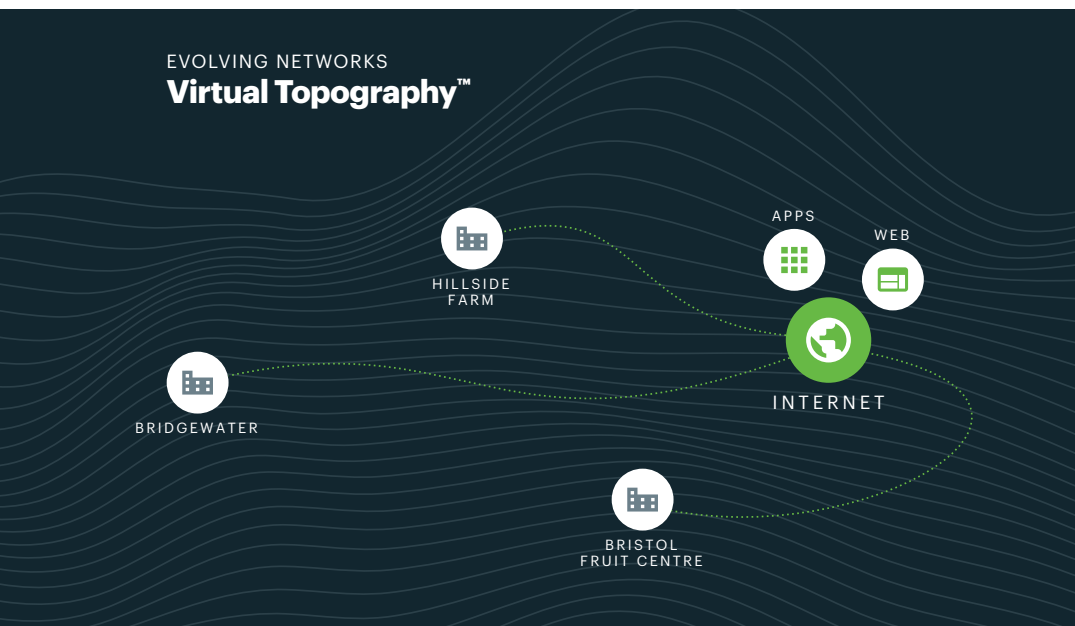

Arthur David
FOOD WITH SERVICE

The solution

Evolving Networks provided an Ultimate Ethernet service for each site, running over two leased lines, supplied by two different providers. Data flows are managed, at the packet level, over all the available bandwidth of the two leased lines, delivering optimal performance and resilience at all times.

Resilient leased lines at each location deliver reliable connectivity to hosted applications

The benefits

- Genuine resilience ensuring optimal performance at all times, even in fault scenarios
- No wasted bandwidth sitting idle
- Faults immediately identified by Evolving Networks eView Live monitoring suite
- Relationships with circuit providers managed by Evolving Networks

Optimal performance and resilience at all times
